Guy,  
Thanks for the note. I will add the three of you to my BB list. We have been talking with the FWS about helping us with a description of wildlife for our assessment. The NPS has come up many times as having relevant expertise. We had talked about their coordinating with you. By this email I am alerting Ann Rappoport that you are the contacts. Any contribution that you can make to that effort is appreciated.

I will contact you soon to touch base.

Thanks  
Phil

Hi Phil,

I'll be the primary contact with the National Park Service, but if it's ok to have more than one, please also add Paul\_Burger@nps.gov (regional hydrologist) and Jeff\_Shearer@nps.gov (Lake Clark resource manager) to your list. Looking forward to the product.

EPA Watershed Assessment

Hello All,

On March 15, 2011 EPA Region 10 Administrator Dennis McLerran sent a letter to your agency to update you on our progress toward the watershed assessment for Bristol Bay. I would like to continue to provide updates but more informally and by email. If you would like to designate someone else to receive these updates please send me their name and email address.

The date we promised to have an annotated outline of our technical document has come and gone. The purpose of this update is to tell you that we are still working on it. We have had some contracting issues that are taking time to work out and which have prevented some of the work from being completed on time. Rather than set a new date we have decided to wait until the contract is fully in place and until we have a draft annotated outline ready for distribution. But to give you some idea - we were targeting early to mid June to ask you all to meet with us to discuss our progress and direction. We hope that time frame will still work. We will be sure to give you advanced notice.

Thank you for your patience and understanding.

Phil
